

Concept Design Overview

Long-Term Concept Design Features

Add tree lawn where missing between sidewalk and travel lanes

Use roundabouts, median refuge islands, and curb extensions to create a gateway and calm traffic

Wider sidewalks

Enhanced Streetscaping and Beautification

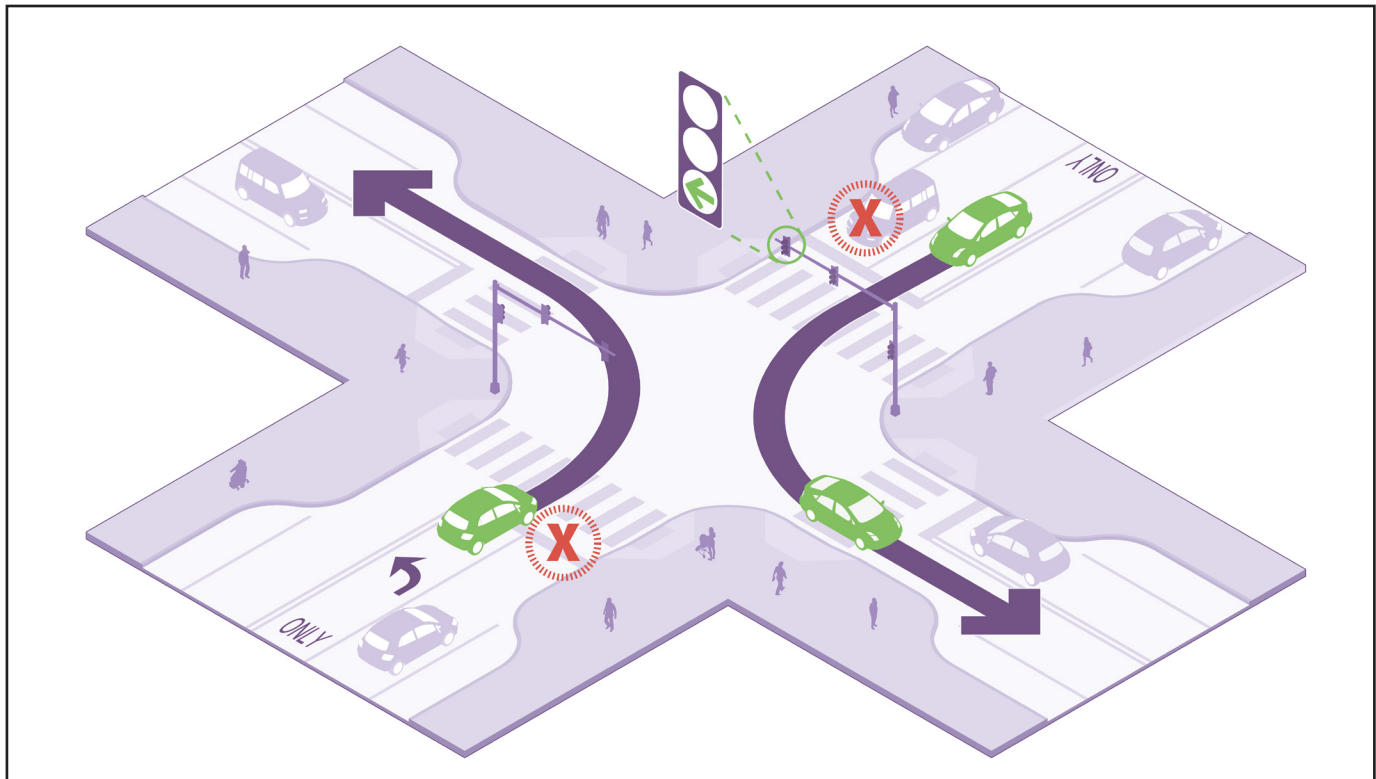

4/5 lane to 3 lane roadway rightsizing

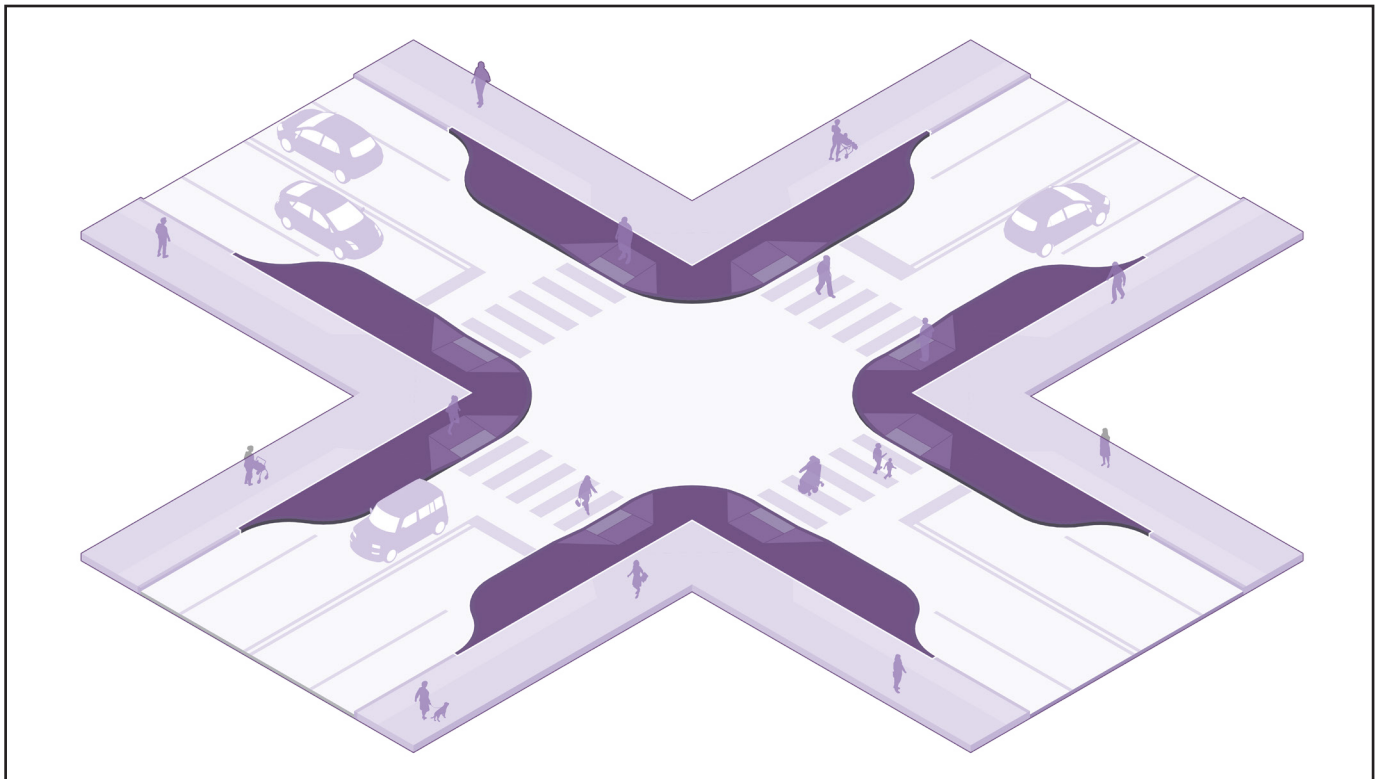

Shared use path from Summit Street intersection to M-14/Huron River Drive

What about short-term design changes?

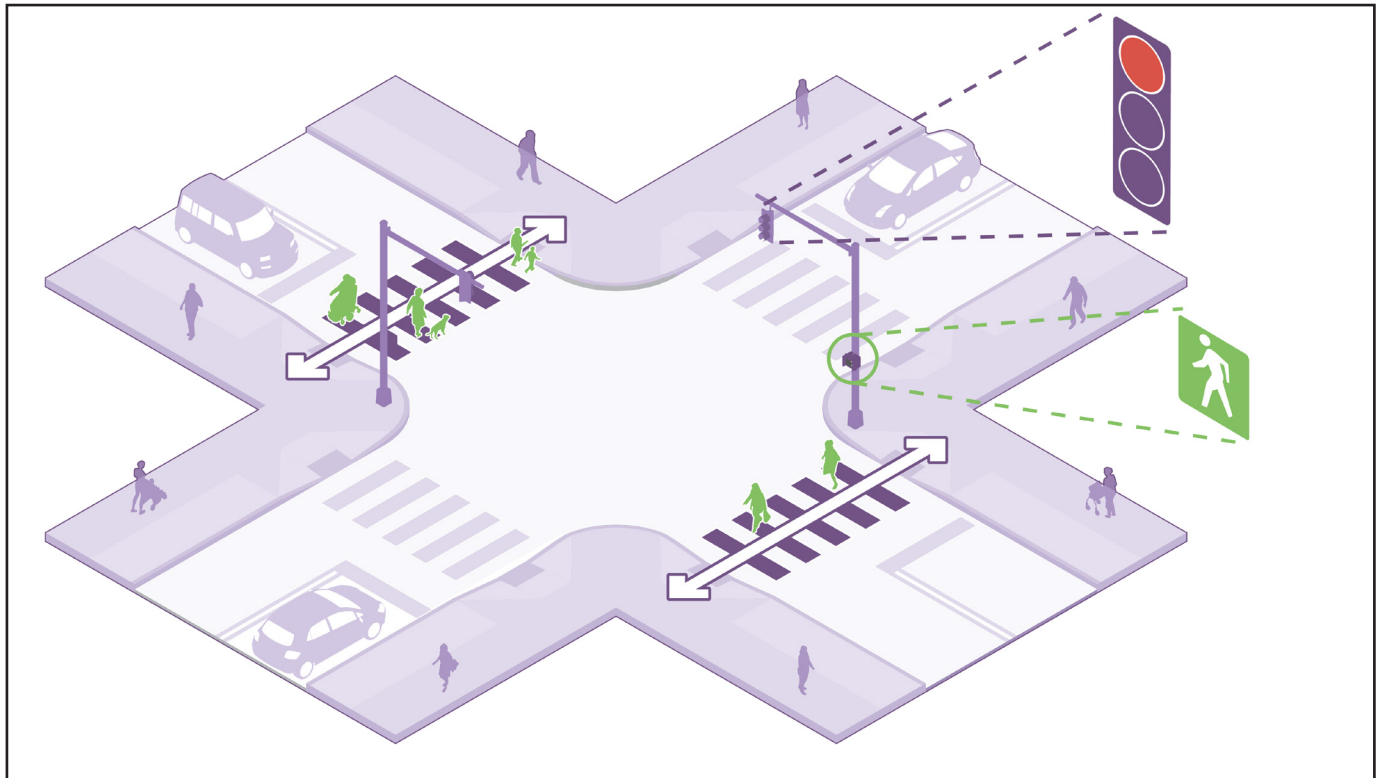

The concepts shown are long-term vision designs. There are also short-term improvements that can be made in the meantime. Some of these improvements may include traffic signal changes to reduce conflicts, curb extensions, median refuge islands, and removal of dedicated turn lanes.

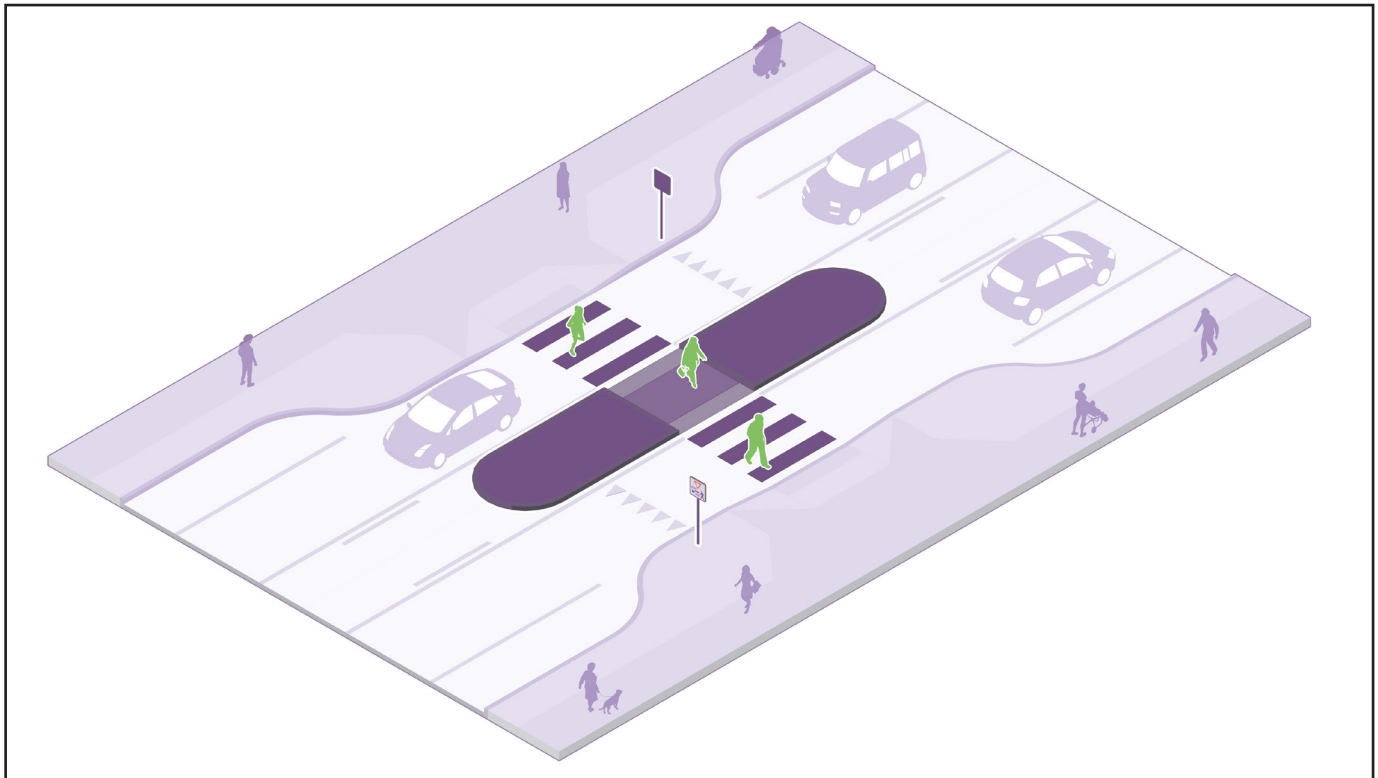

Protected left turn phase

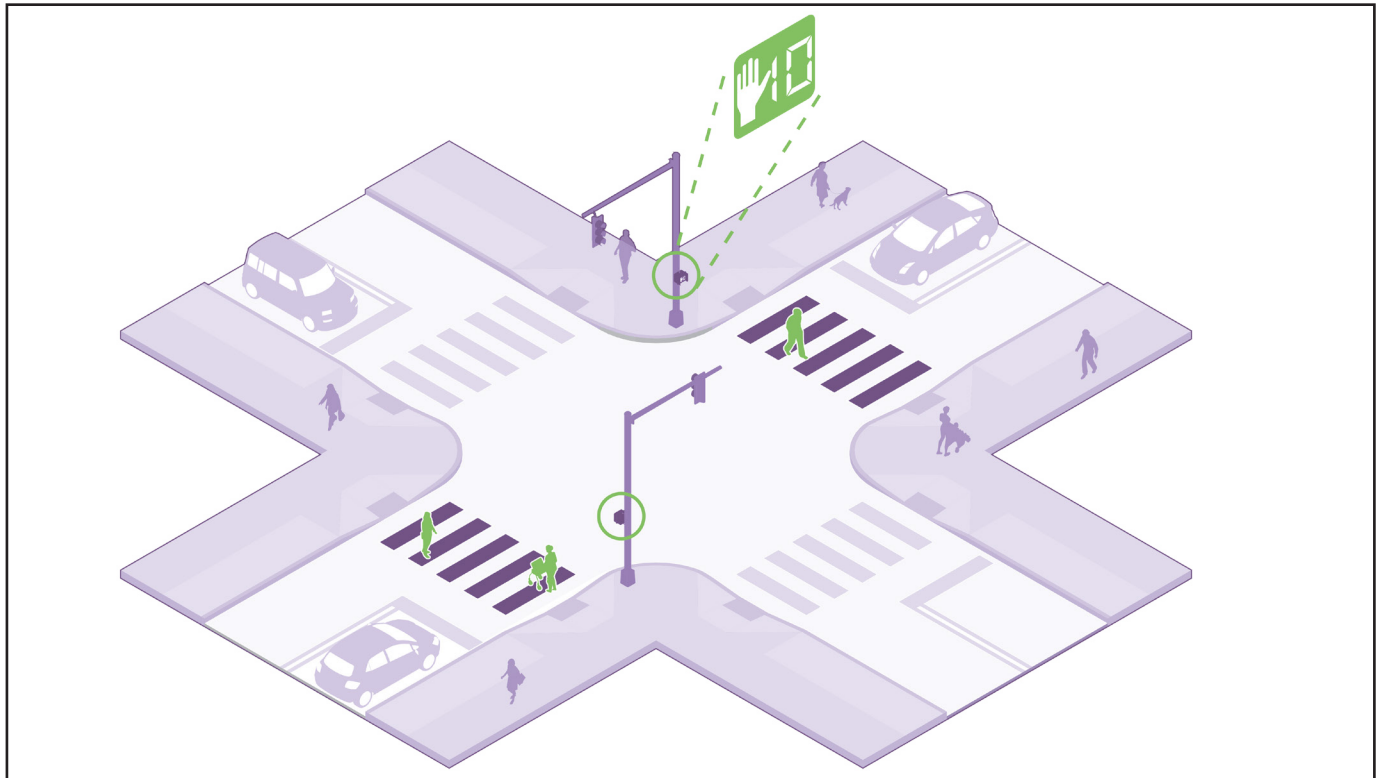

Curb extension

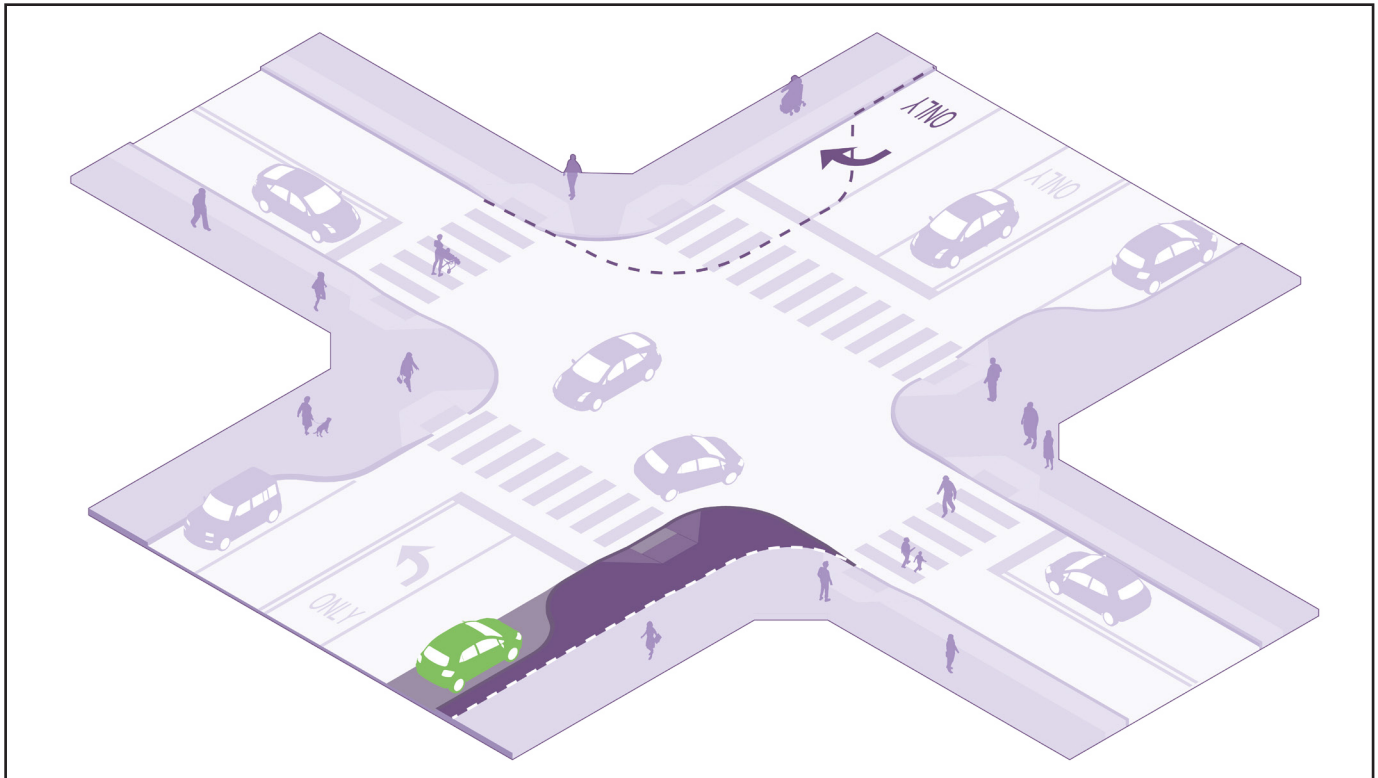

Leading pedestrian intervals

Median refuge island

Pedestrian countdown timer

Removal of dedicated turn lane
