ROADWAY DESIGN FEATURES

EXAMPLES OF DESIGN TOOLS

SHARED USE PATH

Paved, two-way grade separated facility for people walking, biking and rolling.

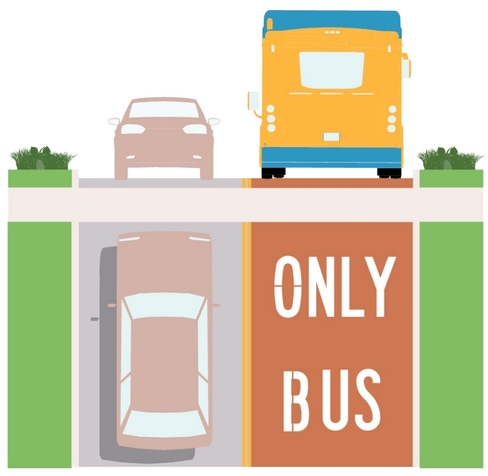

SEPARATED BIKE LANE

Bike facility with a vertical separation, such as a curb or a flex post.

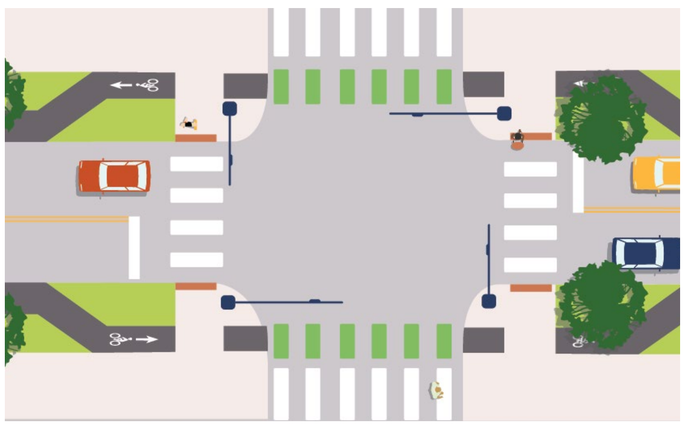

DEDICATED TRANSIT LANE

Bus lane separated from vehicular travel.

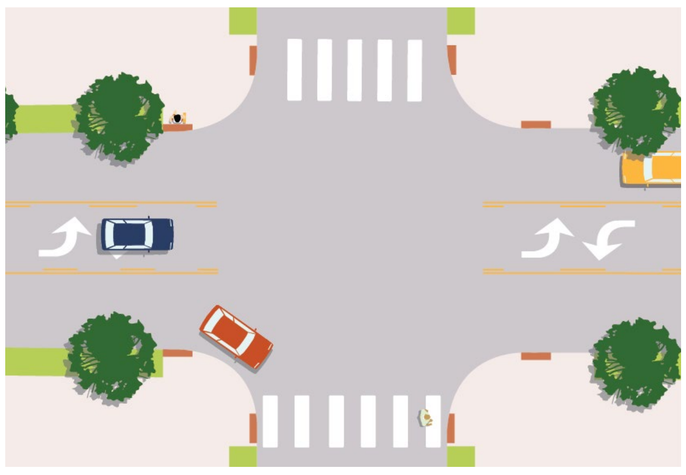

PROTECTED INTERSECTION

Curb protected bicycle crossing at intersections.

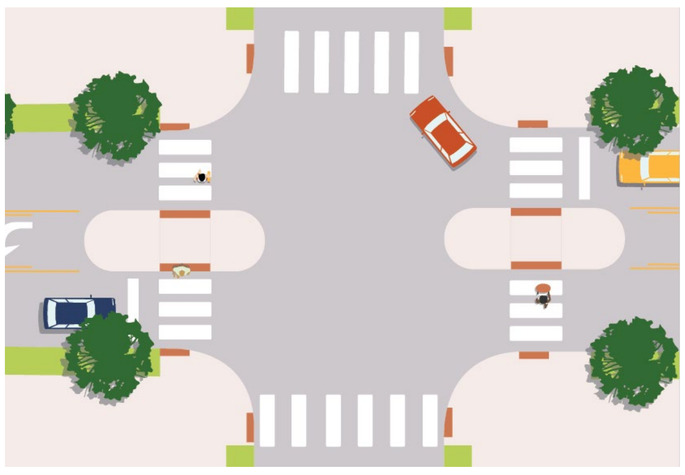

TWO-WAY LEFT TURN LANE

Center lane dedicated to left turning vehicles.

PEDESTRIAN REFUGE ISLAND

Raised, protected median for pedestrians to cross one direction of traffic at a time.

EXAMPLES OF DESIGN FEATURES

Protected intersections

Separated bike lane

Sidewalk-level separated bike lane

Shared use path

Bus only lane and separated bike lane

Pedestrian refuge island and separated bike lane
